Client Proposal Deck
February 2026

The Efficiency Gap

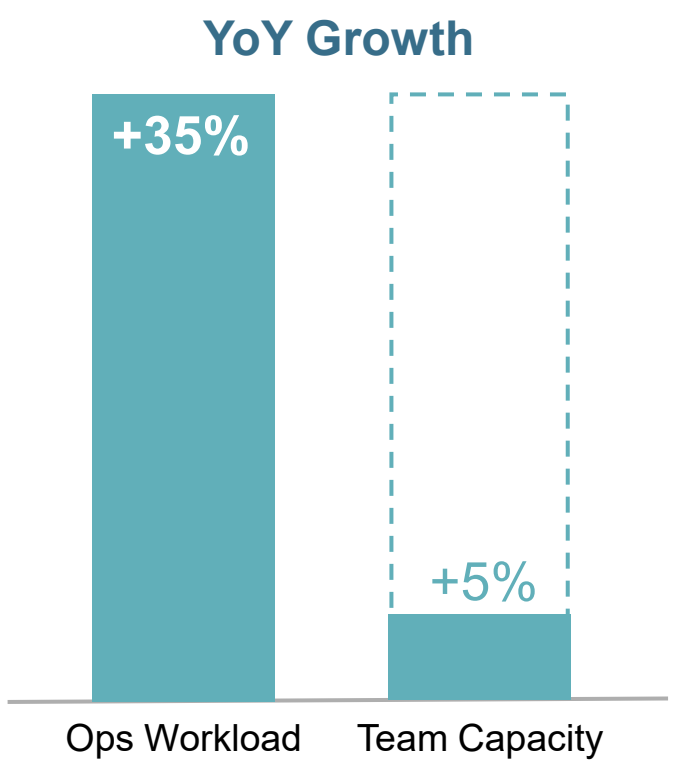
Data shows an alarming widening gap between operational demand and human capacity.

Operational workloads have grown 35% YoY, while team capacity has only grown 5%, resulting in over 60% of daily workflows still handled manually. This growing divide creates **delays, errors, inconsistencies** and unnecessary costs.

The result? A significant “Efficiency Void”

Organizations spend **82%** of employee time on repetitive operational tasks, instead of strategic, revenue-driving work.

How has your organization been affected?



The Opportunity Cost

Inefficiency compounds quietly,
Until it becomes expensive

Teams spend a significant portion of their effort on repetitive, low-value tasks. As volume increases, response times slow, errors multiply, and customer experience suffers.

Organizations that delay automation absorb higher costs and lose ground to faster-moving competitors, who scale 2–5× faster through AI empowered automation while costs decrease with scale.

Solve the bottlenecks.
Let your business accelerate with us now.

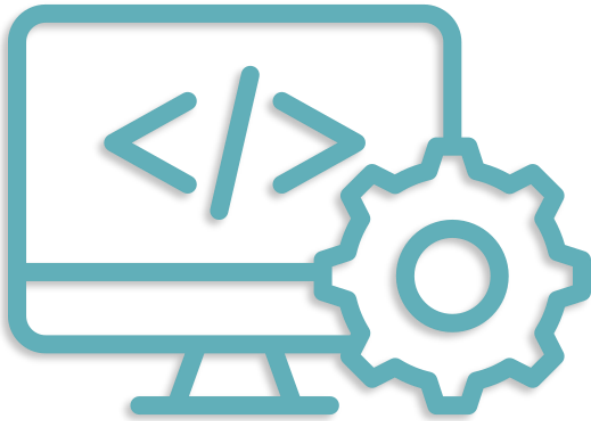
Our Approach

Personalised
Consulting



Bespoke
AI Automations

Maintaining
& Optimising

Strategic Consultation

We believe meaningful automation begins with understanding how your business truly operates as it is our commitment to provide all our clients maximum value.

We do not conduct generic discovery calls.
We deliver a ***structured, high-intent consultation*** designed to uncover operational inefficiencies and scalability constraints.

By reviewing workflows across core business functions, we identify manual handoffs, system fragmentation, and decision bottlenecks. The result is a clear view of where automation can drive speed, accuracy, and operational consistency.

At the conclusion of the session, you will receive:

- *Comprehensive Business Assessment Report*
- Identified automation opportunities
- A clear path toward execution, if aligned

Intelligent *AI* Automations

We believe automation should adapt to how
your business operates not the other way around.

We do not provide cookie-cutter automations.
We deliver ***end-to-end bespoke AI automation systems***.

By connecting tools across core business functions, we eliminate manual handoffs and create consistent, scalable workflows. The result is faster execution, improved accuracy, and full operational visibility.

Technology is never the goal; better business performance is.

That is why we have an onboarding process for those who are serious in improving their business. Interested?

Transforming Workflows

Client Case Study 1

Key issues highlighted post consultation:

- Lack of time to maintain consistency in
- No marketing system to keep track

Before Working With Revolvix:

Manual Content Creation Process

Trend & Topic Research, Ideation, Graphic Design, Writing Captions, compliance check, vetting, approval, et cetera…

Lack of systematic process create, store, approve and post content. Slow turnaround times, inefficient marketing operations.

(Est. 1 week to generate 2 approved posts)

After Working With Revolvix:

Implemented Automations

Automated Strategic Marketing Team

Features Include: Marketing Planner & Strategist, Cloud Organiser, Copywriter, Caption & Image gen, Compliance, Idea & Image generation, media database, et cetera…

Streamlined marketing processes, provided a reliable and intelligent system

Client: "WOW, this truly saves so much time! We had no centralised system previously and it was so hard to keep up to date with posts and changes. I didn't know such a software is possible!"

Transforming Workflows

Client Case Study 2

Key issues highlighted post consultation:

- Time Consuming Screening of Stocks
- Research of Equities & Economy

Before Working With Revolvix:

Manual Equities Research

Data Gathering, Qualitative & Quantitative Analysis, Financial Modelling, Valuation, Investment Thesis, Competitor Analysis, et cetera …

Large amount of time goes into retrieving this information and doing manual calculations and modelling to achieve a full comprehensive stock pitch. Additional manual work into stock screening, earnings tracker and economic research.

(Est. 1 week to research 1 company in depth)

After Working With Revolvix:

Implemented Automations

Automated Screener & Equities Research Team

Features Include: In depth Qualitative & Quantitative Analysis, Analysts Ratings Tracker, Insider Tracker, Valuation Modelling, Earnings Tracker, Equities Screener, et cetera…

We automated data collection from official sources and generated investment ready stock pitches aligned with their methodology. Paired with an auto stock screener and earnings tracker, this unlocked faster, more scalable equity research.

Why Choose Us?

- ## Zero - Risk Adoption – Complementary Strategy Consultation
  15 minutes online consultation – find out how you can optimise your business
- ## Designed With You, For You
  We identify operational bottlenecks and high-impact opportunities
  Then design an automation blueprint aligned to your priorities and ROI goals
- ## Proven Systems
  We utilise enterprise grade automations software that is proven to work
  Guaranteed client satisfaction
- ## Optimisation & Maintenance
  We ensure that your system is up-to-date and remains compliant
  Growing too fast? No worries, we will update according to the needs of your business
